

Connect Platform 23.1.2

This document describes the issues included in the CONNECT software release.

Fixes

Fixes include corrections for the following issues:

<i>Application</i>	<i>Category</i>	<i>Issue</i>	<i>Description</i>
	Case Error Check	16602	Resolved issue causing the Plan Requires Pre-Authorization rule to check all insurances, not just the active / selected ones on the case.
		16604	Fixed issue causing errors if concurrency check is set as a warning.
	Charge Batches	16603	Fixed issue causing the charge batch Preview Submission report to not display diagnosis codes and anesthesia time correctly.
		16609	Fixed issue causing Connect to timeout due to slowness when opening charge batches.
	EDCs	16605	Fixed issue generating an internal database error message when trying to commit EDC data.
	Rooms	16612	Fixed issue causing Room numbers being added to facilities to not be retained and carried over for selection when creating cases.
