Connect Platform 23.3.1

This document describes the issues included in the CONNECT software release.

Fixes

Fixes include corrections for the following issues:

Application	Category	Issue	Description
Back Office	Accounts	17161	Modified logic to enable the **Adjust Line** button on the **Account AR** tab if SVCFE is $0, but it has never been reversed.
	Cases	17159	Fixed issue generating internal error messages when trying to review related cases from the **Error Check/Warnings** section of a case.
	Referring Providers	17158	Fixed issue causing some Referring Providers to not be included in the drop down lists of physicians when creating cases and also not visible in Admin > Providers, causing a duplication error message when trying to add them to the database.
