Connect Platform 3.9.6

This document describes the issues included in the PPMCONNECT® software release.

Enhancements

Enhancements include new features and modifications for the following issues:

Application	Category	Issue	Description
Administration	Claims	CNCT-5561	Added a claims configuration option to the MediCal *CMS 1500 02/12* claim form to leave the *To* (date) field in the date(s) of service area blank.
		CNCT-5630	Modified logic of the Oklahoma Medicaid *NUCC 1500 02/12* claim form to print non-Medicare primary insurance payment amounts in box 29, when the secondary payer is Medicaid.
	Roles	CNCT-5912	Added the *View* permission to the Back Office tab, *Persons and Organizations* line. **Please note:** By default, this permission is unchecked. To activate this functionality, check the *View* checkbox for both the *Account* and *Persons and Organizations* lines.

Fixes

Fixes include corrections for the following issues:

Application	Category	Issue	Description
Administration	Fee Schedules	CNCT-5963	Fixed the problem causing cases and reports to display zero expected time units on a case with no payment, after expiring and then reactivating the original expected fee schedule and recomputing time units.
Back Office	Statements	CNCT-5722	Fixed the problem causing part of the service dates on statements not to display, when attempting to print a statement using a MAC-based operating system.
