

Connect Platform 4.5.3

This document describes the issues included in the BASCONNECT™ software release.

Enhancements

Enhancements include new features and modifications for the following issues:

<i>Application</i>	<i>Category</i>	<i>Issue</i>	<i>Description</i>
Back Office	ERA	8968	The Override Payer ID field of an ERA import now accepts Payer IDs with 5 to 50 digits.
	General	8994	F1 Help links added for new topics.
	Rebills	4441	The following information can now be updated on a case without performing a rebill: <ul style="list-style-type: none">• Facility Case ID (General Case Information tab)• External Case ID (General Case Information tab)• Force Self Print (Patient, Guarantor & Insurance tab)
	Reports	8849	Modified ePreop XML format with the following changes: <ul style="list-style-type: none">• If no anesthesia procedure exists on the case, do not send AnesthesiaStartDateTime, AnesthesiaStopDateTime, AnesthesiaType, or ASAStatus.• Cases without the patient's gender identified as 'M' or 'F' will not be sent.• Reporting logic modified to appropriately return a provider on cases that do not contain anesthesia procedures.

<i>Application</i>	<i>Category</i>	<i>Issue</i>	<i>Description</i>
	Revenue Advantage	8939	The Revenue Advantage file export will pull from the Day, Evening, and then Organization phone number fields in Connect in order to populate the PATPHONE field in the export file.

Fixes

Fixes include corrections for the following issues:

<i>Application</i>	<i>Category</i>	<i>Issue</i>	<i>Description</i>
Back Office	Payment Batches	8937	Fixed issue causing Illinois 2360 DPA paper claim snapshot to fail when facility name is longer than 28 characters.
