Connect Platform 4.7.1

This document describes the issues included in the BASCONNECT™ software release.

Fixes

Fixes include corrections for the following issues:

Application	Category	Issue	Description
Back Office	Charge Batches	10165	Fixed issue causing updated patient name to not save.
		10204	Fixed issue causing internal database error when submitting a case with CRNA directing solo if the CRNA also has another code listing them as the provider.
	Persons	10198	Person search functionality modified: • If a SSN is entered as part of your search criteria, either solely or in combination with other search criteria, the system only uses the SSN to search the database and return matches. Any search criteria entered in addition to the SSN is not used in the search. • If a SSN is not entered as part of your search criteria, the system uses all search criteria *(First Name, Last Name, DOB, and/or Phone)* entered to search the database and return matches.
System	Code Updates	10201	Added 2018 ICD-10 code updates.
