

Connect Platform 4.8.1

This document describes the issues included in the BASCONNECT™ software release.

Fixes

Fixes include corrections for the following issues:

<i>Application</i>	<i>Category</i>	<i>Issue</i>	<i>Description</i>
Back Office	Accounts	10512	Fixed issue preventing users from using links on the Home page after the Account Notes functionality had been used.
	Image Batches	10517	Fixed issue causing Posted/Unposted searches to return the wrong results on the Image Batches / Scan Batches tab.
	Payments	10529	Modified logic so when adding an allowed amount on a non-primary payment, the CWOFF field is not automatically populated and/or posted to the account when the payment is posted. The CWOFF field must be manually populated.
